From Seed To Plant

Synopsis

Do you know how a seed begins? What pollination is? How flowers, fruits, and vegetables get to be the way they are? The mystery of how seeds are formed and grow into plants is revealed for young readers in this informative book. Included in Appendix B of the Common Core State Standards.

Customer Reviews

K-Gr 2-Gail Gibbons's introduction to plant growth and reproduction (Holiday House, 1991) offers clear yet basic information about the entire plant cycle from seed pollination to mature growth. Included at the end of the text are simple facts about seeds and plants as well as a "From Seed to Plant" project that explains how to grow a bean plant. Gibbon's distinctive bold and colorful illustrations include easy-to-read labels, with simple and clear descriptions throughout the text. Erin Mallon's reading is clear and well-paced, allowing students to read along easily. Page-turn signals are optional. For school and public library collections.-Amy Joslyn, Fairport Public Library, NY

Gail Gibbons has published close to fifty distinguished nonfiction titles with Holiday House.

According to "The Washington Post", "Gail Gibbons has taught more preschoolers and early readers about the world than any other children's writer-illustrator." She lives in Vermont. Her website is www.gailgibbons.com

One of three books purchased as a gift. I like this book for the little girl.

Very informative story

This book was about growing a seed into a plant. My daughter absolutely loved this book and will read it over and over. The illustrations are beautiful and the information is good. I have been encouraging her to read more on her own (she's 7 years old) so it helps to find books that she loves and will read over and over. I especially like the fact that it's educational. ;-)

My class loved this book, and it helped them to have a better understanding of what happens from the time a seed is planted until... They loved the pictures too, seeing the different parts of a plant.

This is a great book to teach or review with young children the fact that almost every thing we eat except meat and cheese comes from seeds or pods of some kind and the things that don't come from seeds usually eat them. So there you are.

Beautiful, colorful illustrations with great descriptions and explanations. My 2 year old loves the pictures in this book and asks me to read it to him all the time.

I loved this book. I ordered this book for my "Little Ones & Br. Tarek's Garden" class. It was read & appreciated. Thank you.

A great little book for per-kindergarten and older kids. It has great pictures to supports the words. Wording is simple, but uses all the correct term foe seed and plant parts. A great book!
