Environmental And Natural Resource Economics: A Contemporary Approach

Synopsis

Harris and Roach present a compact and accessible presentation of the core environmental and resource topics and more, with analytical rigor as well as engaging examples and policy discussions. They take a broad approach to theoretical analysis, using both standard economic and ecological analyses, and developing these both from theoretical and practical points of view. It assumes a background in basic economics, but offers brief review sections on important micro and macroeconomic concepts, as well as appendices with more advanced and technical material. Extensive instructor and student support materials, including PowerPoint slides, data updates, and student exercises are provided.

Customer Reviews

"An important achievement. This is a carefully crafted textbook that should appeal to students from the natural sciences, as well as those from economics and other social sciences. The text covers a number of important topics that most texts neglect, including agricultural sustainability, the relationship between trade and the environment, and the role of local and national institutions in promoting environment-friendly development. The tone of the book is formal yet friendly, and the layout of text, tables, and figures is top notch. Each chapter includes numerous useful links to material on the worldwide web. This book should prove popular with students and instructors alike."
-- Gerald Shively, Purdue University "The perfect introductory text covering environmental and natural resource economics. The choice and sequence of topics is excellent and the authors have provided the right balance between the neoclassical and ecological approaches. It is a most appealing text." -- Steven Kemp, Curtin University, Australia

Jonathan Harris is Senior Research Associate and Director, Theory and Education Program, Global Development and Environment Institute, Tufts University, USA. Brian Roach is Research Associate, Theory and Education Program, Global Development and Environment Institute, Tufts University, USA.
