Customer Reviews

Although the reviews told me this book didn't have much detail, it was even skimpier than I had expected. It does at least list the state parks that have specific RV sites and shows them on a rudimentary map, but other than that, there's not much information. The state park websites I've checked are much more helpful. If you know what state you want to visit, skip this book and just go to their parks website.

My husband and I just returned from a 4,000-mile trip around the U.S. in a rented RV. We had no planned itinerary, and we took our two labs with us. This book was extremely useful for finding non-RV park places to camp as well as places to stop to exercise the dogs during the day. Although there is not much detail in the book about each park, there was enough for planning purposes and we could always check out the parks on line if we had phone service while we were traveling. I took

other books I had bought for the trip with us, but this one was our go-to book.

Very little information on campgrounds, basically name, address, and phone #.

This book covers all of the states. I find it very interesting and helpful. I like to go to the back of the parks where one can park and have a quiet time of their own.

Needed information

small compact book... fits nice in my rv. Great infor on All state parks.

sister loved it

It may not have as much detail as I'd prefer but it's a quick resource that gets you to the point where you can move on to doing the more detailed search by phone or online. In this day & age that may not sound like much but sometimes it's exactly what I'm looking for.
