Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

I love these guides, I have a dozen, and I love them. They're small, but fold out big. A dozen doesn't

weigh a pound, so it's an easy carry, and the guide is very easy. It's not like reading a textbook. If you'd like to identify your surroundings, these are the way to do it.

I went camping with my boyfriend on Assateague island and we absolutely loved having this with us on beach walks! It's surprisingly sturdy and quite informative. Who knew sea pork was an actual thing?

I'm not sure why they call this a paperback as it's really a laminated fold-out brochure. That was fine with me though and holds up better when camping on a beach than a paperback would. The illustrations were clear and it was nice to be able to identify the things we saw on the island. It's a convenient size, easy to fold up and tuck away, and very durable (held up to man-handling by an almost 2-year-old). It doesn't include insects however, and that was what we saw the most of! It would have been nice to give a proper name to the multitude of tiny things devouring us.
