Phyllis Dutwin is the president of Dutwin Associates, consulting with major publishers in developing books for adult students. Carol J. Altreuter, M.Ed. has had 17 years of diverse experience in adult education, as well as eight years of elementary/middle-school teaching. Kathleen A. Guglielmi, Ph.D. is an assistant professor of adult education at the University of Rhode Island.

I took the TABE this morning. Level A computer based test! I knocked it out of the park. Hadn't picked up an academic book in over 15 years since graduating high school and made 12.9+ score on Language, Reading & especially MATH!! This book really lays it out for you and gives you the practice you need. Take the time and go through the book, you won't regret it!!

I didn't know what to expect from the test, so I bought this book. I looked over a little bit of the reading and a little of the math part. The book does cover good basic things learned from grade school through high school. Overall I didn't need this book at all. I over worked myself up for the TABE test that was super easy for me.

This book is the worst text book I have ever utilized. It is loaded with information you don't need, and finding the information you do need is extremely difficult. I found it so frustrating that I purchased another book to replace it.

I needed to take a TABE test for school and I have not been in a formal school setting in almost 20 years. I was concerned with the MATH portion since there are not too many occasions that I have the opportunity to divide fractions and such. I aced my test with two 12.9 scores, so this book worked for me and should work for you too. The TABE test that I took for the state of Florida separated the categories. Example: 25 MATH questions in 25 minutes, without a calculator. Just from brushing up on my skills with this book I was able to correctly guess at some of the answers since I was running

out of time. i would not have been able to make an educated guess that was correct prior to using this book.

I bought this book to get a level A on the TABE. I have always gotten level Ds. I took the TABE this morning and went online to view my scores. 12.9 in all areas! I read the book page to page, all the sections had pretty good examples. I do have to say though, some answers in the answer keys are wrong. Keep that in mind if you get this book. I HIGHLY recommend this book for anyone that needs to get a level A on their test.

The book does a poor job explaining how to tackle the math problems, it assumes you already have your own way of doing them and it asked you to practice it. It tells you what you have to do to solve the problem but it doesn't really tell you really how to go about it..again it assumes you already know, once they explain the objective of the math problem. If you are taking the TABE and you want to buy this book, but barons GED book too.....barons explains indeph how to attack the problems.. This book is only good for its diagnostic exams..

This book is nice for knowing what will be on the placement test. I need to brush up on my math and this did nothing but confuse me. I have other books that are more useful than this one. I've been out of high school for years and I could comprehend math problems when I need to. This book did not satisfy me at all. I will continue to keep practicing with other books before I take the test. If you're in a crunch like me and you just want to know what could be on the test get this book. If you really need to score high to get into nursing I wouldn't recommend this book unless you have the time to through lessons and lessons before you get to the answer key.

The textbook was just what I was looking for. Self explanatory and good illustration. Will purchase again from seller.
