Mary Herczog writes a great many books for Frommer's (Frommer's Las Vegas, Frommer's New Orleans, California For Dummies, and Las Vegas For Dummies, among others) and lives in the hopes of writing a great many more. When she is not traveling or writing, she lives in Los Angeles and works for Hollywood. She has spent upwards of a week in Vegas and not so much as touched a slot machine.

i bought this edition to complement the full "Frommer's Guide to Las Vegas" (which I already had) but did not find it especially helpful. Most of the information was already in the full edition. Would recommend the full one as it has a great deal more in it to pick and choose from. Even if you're not a gambler, most of us still want to visit the big casinos to see all the glitz.

Great read

This book seems to have last been updated around late 2004 for 2005 publication. While it might have been useful once, things change so fast in Vegas, including entire resorts coming and going, that maybe 40% of this book is wrong or useless by mid-2012. I questioned the value of even checking it out of my local library for free; it's not really worth purchasing unless/until it's updated again. I read the reviews of brunch buffets on some random other website earlier in the day before reading this, so it's not like the content is even exclusive. The formatting for Kindle is pretty poor, with what were surely sidebars in the print version randomly interrupting the main text in mid-sentence, and I think there were several ganged together in at least one place that made me completely lose track of the flow. The maps on the Kindle are way too small and too blurry to read - they just look like bad scans instead of purpose-created electronic pictures. The text itself also needed some more careful editing; for example, Cirque du Soleil is repeatedly miswritten with "de" everywhere except the actual section on shows.

It would seem that this book has not been updated in some time since The Blue Man Group hasn't been performing at Luxor for over a year.
