Cannabis Revealed: How The World's Most Misunderstood Plant Is Healing Everything From Chronic Pain To Epilepsy

Synopsis

Did you know you have a widespread receptor system that interacts with the compounds in cannabis? *Cannabis Revealed* is the only book written by a medical cannabis specialist, explaining the science behind the use of this amazingly therapeutic plant and describing in easy-to-understand detail the recently discovered endocannabinoid system, involved in almost every human physiologic process. Although 28 states have medical cannabis laws, most physicians are reluctant to discuss how this plant may be beneficial to health. Over 4 million people in the U.S. are healing difficult-to-treat illnesses with cannabis medicine. This book is an educational tool for patients and their loved ones who have not found answers with conventional medicines. Written by Bonni Goldstein, M.D., a well-respected practicing physician in California, and owner and Medical Director of Canna-Centers, this book explains the scientific research for over 28 chronic medical conditions for which cannabis is being used with positive results. Having helped thousands of suffering patients — including children — find relief with cannabis, Dr. Goldstein shares her expertise and years of clinical hands-on experience in chapters like *How to Use Cannabis as Medicine*, *The Safety Profile of Cannabis*, and *Medical Risks of Using Cannabis*, as well as true stories of how cannabis medicine has improved the lives of her seriously ill patients. As medical cannabis laws continue to evolve, it is more vital than ever for patients suffering from life-changing medical conditions to understand the benefits of this plant in an honest, medicine-based perspective. Educational, practical and comprehensive, *Cannabis Revealed* exposes the truth behind cannabis so patients can make informed decisions and improve the quality of their lives. "A major contribution from a leading physician on the front lines of the medical marijuana revolution. Dr. Bonni Goldstein's book is a must-read for anyone who seeks to understand the healing potential and practical application of therapeutic cannabis." — Martin A Lee, director of Project CBD and author of *Smoke Signals*

Customer Reviews

Bonni Goldstein, M.D. is a physician who specializes in cannabis medicine in Los Angeles, California. She specialized in Pediatric Emergency medicine for years before witnessing the amazing benefits of this treatment in an ill loved one. Since then, she has successfully treated thousands of adult and pediatric patients with cannabis. She regularly speaks about cannabis medicine at conferences and patient groups around the world. She is the owner and medical director of CannaCenters and medical advisor to Weedmaps.com. Dr. Goldstein was awarded “2017 Medical Professional of the Year” by Americans for Safe Access.

Great for anyone interested in being better educated on the subject. One of my favorites so far.

Very informative and well written!!

If you're wanting to know about Cannabis, this book is AMAZING!!!

Terrific book. Just the right information needed to learn how to heal with cannabis.

Awesome book to help understand the cannabis plant as a medicine.

Very informative, well put together, great understanding of medical uses.

Great book and service

Super easy read. Love the case stories. I know Dr. Bonnie as I lived in San Diego, CA. A lot of my friends used her to help their children with Epilepsy use cannabis. She is so knowledgeable. Thank you Dr. Goldstein for writing this amazing book. I have a son with an autism diagnosis and I used medical cannabis for him for 2 years while I lived in CA. We saw so many gains, most importantly my son had an improved quality of life. He was happier and able to understand his worlds much

better. We saw improvement in his IEP goals, increased fine and gross motor function, less anxiety, decrease tummy bloat, improved digestion, improved cognition, improved mood, ability to learn increased, frustration decreased, speech improvements and decreased brain inflammation. I know because he had a big lump on the back of his head that softened and got smaller. Cannabis heals. It is a God given plant meant to heal us. It was used for centuries as medicine before greed took over and made it illegal. We have an endocannabinoid system. We create our own cannabinoids called endocannabinoids. Dr. Bonnie explains it more.
