How A Seed Grows (Let's-Read-and-Find-Out Science 1)

Synopsis

How does a tiny acorn grow into an enormous oak tree? This classic Level 1

Let's-Read-and-Find-Out picture book shows how little seeds become the plants and trees that surround us. Now rebranded with a new cover look, this book includes a find out more activity section with a simple experiment encouraging kids to discover what a seed needs to grow. Both text and artwork were expert-reviewed for accuracy. This is a Level 1 Let's-Read-and-Find-Out, which means the book explores introductory concepts perfect for children in the primary grades and supports the Common Core Learning Standards and Next Generation Science Standards.

Let's-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.

Book Information

Lexile Measure: 470 (What's this?)

Series: Let's-Read-and-Find-Out Science 1

Paperback: 32 pages

Publisher: HarperCollins; Revised edition (August 4, 2015)

Language: English

ISBN-10: 0062381881

ISBN-13: 978-0062381880

Product Dimensions: 10 x 8 inches

Shipping Weight: 4 ounces (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars 65 customer reviews

Best Sellers Rank: #47,934 in Books (See Top 100 in Books) #19 in [Books > Children's Books > Education & Reference > Science Studies > Botany](#) #21 in [Books > Children's Books > Education & Reference > Science Studies > Nature > Forests & Trees](#) #27 in [Books > Children's Books > Education & Reference > Science Studies > Nature > Flowers & Plants](#)

Age Range: 4 - 8 years

Grade Level: Preschool - 3

Winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series

Helene J. Jordan was a science editor associated with the American Museum of Natural History.

She also served as the editor of Natural History magazine and as the director of the Rockefeller University Press. Loretta Krupinski has illustrated several children's books, including Dear Rebecca, Winter Is Here by Jean Craighead George, The Irish Cinderlad by Shirley Climo, and her own Into the Woods: A Woodland Scrapbook. She has also illustrated one other book in the Let's-Read-and-Find-Out Science series, Why Do Leaves Change Color? by Betsy Maestro. She successfully grew all the bean plants pictured in this book. She lives on the coast of Maine.

A great way to teach children all about Seed's.

I love this book! 4 year old loves it! I enjoyed "Let's read and learn about science" books growing up. This Series is still the best!

We are using this as part of our science curriculum. It goes through putting dirt in egg shells, planting a seed (what a seed needs to grow), and then digging a seed up every so often to check the progress. It is worded so that children ages 3-7 could use it (in my opinion). We re-read each day that we dig up a seed until the seeds left have become seedlings/plants. The kids never get tired of it, and in fact usually are excited to 1. state what is needed for a plant to grow and 2. guess/remember the next stage of the process.

perfect for my kindergarten class!

Excellent condition

My kindergartner enjoyed reading this book to her little sister and me the other day. The language is easy enough for her to sound out the words with a fairly good flow when she comes across unfamiliar ones. The story and illustrations are cute as well as educational, and inspired the right questions about seeds, growing things and gardening. It was the perfect companion to our project that day, which was to plant an indoor herb garden.

Pictures helped children see and understand more about how plants grow.

This book is good if you are going to follow the project in it with your classroom, but does not

smoothly transition into a storytime read. It may be a good addition into a science center at the preschool level.
