# Ecology: Concepts And Applications, 4th Edition

## **Synopsis**

This introductory general ecology text features a strong emphasis on helping students grasp the main concepts of ecology while keeping the presentation more applied than theoretical. An evolutionary perspective forms the foundation of the entire discussion. The book begins with the natural history of the planet, considers portions of the whole in the middle chapters, and ends with another perspective of the entire planet in the concluding chapter. Its unique organization of focusing only on several key concepts in each chapter sets it apart from the competition.

Manuel Molles received his Ph.D. from the University of Arizona. He currently teaches at the University of New Mexico and is also Curator of Fishes and Aquatic Invertebrates. Dr. Molles has written and co-authored a number of publications on various ecology topics throughout his career, many of which he has presented at national and international conferences. Additionally, Dr. Molles was a Fulbright Scholar in Portugal.

Much Much less expensive than the alternative which my teacher wanted us to buy. Basically the exact same book, just a couple of pages moved around. Saved me lots of money!

I used it for my ecology class that needed the newest edition, but this edition had everything the new edition had. The chapters may be in different order but the titles are the same and they were easy to find.

This book is great, and you cannot beat the low low low low price! I will keep my eyes peeled for more text books that pique my curiosity! Thanks again for a great deal!

Very efficient ! Fast service!!

Quite readable and usually well organized review of the essentials of the Ecological sciences. I enjoyed the way the authors interspersed the text with up to date peer reviewed study results.

This book came on time and it is exactly what I thought it would be. A book, about ecology , that is very useful for my class... on ecology! thanks !

This is a great product and I will be purchasing it again.

great book, great price!
