By the help of this Book, I have learned some essential lessons like:(a) How to beat negativity(b) How positive psychology works.(c) How to control myself from all type of negativity and be stand positively.(d) How to make my mind free from all type of negative thoughts and much more things. Every chapter of this book gave me more & more guides, tips and information. Everything helped me a lot to get a better understand about this matter and I am really thankful to the author "James Rand" . He just did a great job and presented all these guides & lessons with easy to understand language. This is my honest opinion about the quality of this book and I found it helpful that's why I put down my opinion here. If you think my opinion is kinda useful then please don't leave without give a helpful vote.

I don't have any doubt to say this was a worth reading because this book showed me about how easily I can delete my all negative thoughts and stand positively. Actually before reading this book I was in confusion about myself like am I right or wrong. I always felt scare and think about the negative side for each matter but now I have understood about positive psychology. All these discussions helped me to improve my self-confident. Thought it was kinda short read but still found this book useful enough and would like to recommend it to all types of readers.

Sound advice -practical thoughts suggested to help build a plan, great insight for moving past the negative mind set, ways to snap out of it-quick read, helpful. Like the distinction between actual

depression leading to negativity or negative experiences leading to feeling depressed. Very key to tackling one's mindset with meditation.

This is an excellent book and well worth reading. Since reading this book my life has followed a similar path to the many people that Mr. Rand refers to that have led positive and successful lives. The book is a classic for a reason. Definitely worth reading.
