Endurance: My Year In Space

Synopsis

A stunning memoir from the astronaut who spent a record-breaking year aboard the International Space Station - a candid account of his remarkable voyage, of the journeys off the planet that preceded it, and of his colorful formative years. The veteran of four space flights and the American record holder for consecutive days spent in space, Scott Kelly has experienced things very few have. Now, he takes us inside a sphere utterly inimical to human life. He describes navigating the extreme challenge of long-term spaceflight, both existential and banal: the devastating effects on the body; the isolation from everyone he loves and the comforts of Earth; the pressures of constant close cohabitation; the catastrophic risks of depressurization or colliding with space junk; and the still more haunting threat of being unable to help should tragedy strike at home - an agonizing situation Kelly faced when, on another mission, his twin brother's wife, Gabrielle Giffords, was shot while he still had two months in space. Kelly's humanity, compassion, humor, and passion resonate throughout as he recalls his rough-and-tumble New Jersey childhood and the youthful inspiration that sparked his astounding career and as he makes clear his belief that Mars will be the next ultimately challenging step in American spaceflight. A natural storyteller and modern-day hero, Kelly has a message of hope for the future that will inspire for generations to come. Here, in his personal story, we see the triumph of the human imagination, the strength of the human will, and the boundless wonder of the galaxy.

Book Information

Audible Audio Edition

Listening Length: 10 hours

Program Type: Audiobook

Version: Unabridged

Publisher: Random House Audio

Scheduled Audible.com Release Date: November 7, 2017

Language: English

ASIN: B071QWWGFX

Best Sellers Rank: #7 in Books > Audible Audiobooks > Science > Astronomy #80 in Books > Science & Math > Astronomy & Space Science > Astrophysics & Space Science #121 in Books > Science & Math > Astronomy & Space Science > Astronomy
