Principles Of Trauma Therapy: A Guide To Symptoms, Evaluation, And Treatment (DSM-5 Update)

Synopsis

Thoroughly updated with DSM-5 content throughout, *Principles of Trauma Therapy, Second Edition: DSM-5 Update* is both comprehensive in scope and highly practical in application. This popular text provides a creative synthesis of cognitive-behavioral, relational, affect regulation, mindfulness, and psychopharmacologic approaches to the "real world" treatment of acute and chronic posttraumatic states. Grounded in empirically-supported trauma treatment techniques and adapted to the complexities of actual clinical practice, this book is a hands-on resource for front-line clinicians, those in private practice, and graduate students of public mental health.

John N. Briere, PhD, is Associate Professor of Psychiatry and Psychology at the Keck School of Medicine, University of Southern California, where he consults and teaches in the ER, burn unit, and inpatient psychiatry, and Center Director of the USC Adolescent Trauma Training Center. He is a past president of the National Child Traumatic Stress Network. A past president of the International Society for Traumatic Stress Studies, he is recipient of the Robert S. Laufer Memorial Award for Scientific Achievement from ISTSS, and the Award for Outstanding Contributions to the Science of Trauma Psychology from the American Psychological Association, Division 56, and has been designated Highly Cited Researcher (Behavioral Sciences) by the Institute for Scientific Information. He is author of a number of books, articles, and psychological tests in the areas of trauma and interpersonal violence, and has a long-standing interest in the clinical applications of meditation,

mindfulness, and compassion. His website is johnbriere.com. Catherine Scott, MD, is Assistant Clinical Professor of Psychiatry and the Behavioral Sciences at the University of Southern California Keck School of Medicine. Her educational background includes Harvard College, Columbia University College of Physicians and Surgeons, and psychiatric residency training at Cornell and USC. She was formerly Medical Director of the Psychological Trauma Program at Los Angeles County + USC Medical Center, and the Associate Medical Director of the Psychiatric Emergency Service at Los Angeles County + USC Medical Center, where she taught and supervised resident physicians and medical students in the assessment and treatment of trauma-related disorders arising from sexual and physical violence, torture, child abuse, and other forms of interpersonal violence. Although continuing to teach, Dr. Scott stepped down from administrative duties in order to pursue writing and research projects. Her clinical and research interests include human rights, women's issues, and the remediation of sexual violence and its effects.

This book was required reading in my Trauma & Intervention class and I loved it so much that I kept it. It is easy to understand if you are new to trauma therapy (which I am). I refer to it fairly often and have absolutely put what I learned to good use. I truly believe this book helped make me a better therapist.

As a professor teaching post traumatic stress reaction to graduate and undergraduate students, I was looking for a book that hit the basics along with some key pieces regarding assessment, diagnostic criteria, and examples that highlighted some of the subtleties associated with complex trauma. This book is well organized and not too overwhelming for people new and beginning the field and a nice refresher for seasoned clinicians. Easy to read, clearly outlined to build upon each subject, I found it both a solid read, affordable, and made it a required read for my course. Please note that I purchased this book way back October 12, 2013 but only now getting to put my thoughts in writing.

A very helpful resource for therapists and counselors. I had it for my trauma and crisis course and I really liked it. It is good even if that is not your area of specialty/expertise. A valuable book.

Very helpful in learning how to conceptualize and deal with PTSD. It would have been even more helpful to go in-depth about talking about certain populations of people who have dealt with traumas (vets, those who have been sexually abused, those who have been trafficked, etc.), but he touches

on groups of people and that is helpful.

Great book on providing therapy to those whose lives have been touched by trauma and the obstacles that must be overcome.

Package arrived on time and undamaged

Excellent text for any counselor dealing with trauma-related disorders.

Intense provider of knowledge. Textbook for my class.
